

# Final Task

## Task Requirements Document

## Task Requirements

Create the Restaurant website.

- Create home, menu, and contact us pages.
- The three pages should have the same header and footer.
- The header contains text or image as a logo, navigation bar and if you want to have a background image, please choose it to look good.
- The footer should have a contact information, location, and the copyright statement.
- The home page contains images, carousel, and some description about the restaurant.
- In the home page add Greeting/welcome statement that change dynamically each 4 second.
- The menu page should contain cards of the meals.
- The card contains image, description, the price of the meal and button to buy or choose this meal.
- The contact us page contains the restaurant contact information and a contact form (I expect from you a nice and professional form).

Apply these changes using JS when submitted the form:

- Apply the validation for each input (make sure all inputs are required). => OPTIONAL
- Change all inputs text to uppercase (onchange).
- Change all inputs text color (onchange).
- Create new paragraph element at the bottom of the form to notify the user that the form has been submitted successfully.

JS:

- if the user hover on price the font-size of price will increase.
- If the user clicks on the buy/choose button, change the image of the meal to this image/ any related image.

## Task Programming Language and Technologies'

Using HTML CSS and JavaScript.

Visual studio 2022

## Evaluation Criteria'

50% on functional Code

20% program workflow

20% Designing best GUI and UX

10% adding extra features that help archives better results.

## Deadline'

Sunday 15/12/2024 at 11:00 PM

## Notes

- Feel free to add your creativity.
- Please do some search before you start and visit some restaurant websites.
- Don't forget to do the reset CSS.
- Use components from bootstrap.
